

SALMA MULLA

CLOUD ENGINEER | CLOUD OPERATIONS | INFRASTRUCTURE & INFORMATION SECURITY

Pune, Maharashtra | 9370978580 | salmamulla8111@gmail.com

PROFESSIONAL SUMMARY

Cloud Engineer with 1.9 years of experience across cloud operations, infrastructure monitoring, observability, and information-security exposure at Airtel Digital. Hands-on experience with ELK Stack, Zabbix, Nutanix infrastructure, Oracle/MySQL/MSSQL/PostgreSQL database monitoring, Linux and Windows server support, alerting and incident-response workflows, and basic automation using Python, shell scripting, and Ansible. Experienced in working with customers and cross-functional teams to understand monitoring requirements and support production infrastructure.

CORE SKILLS

Cloud & Infrastructure

Cloud Operations, Infrastructure Monitoring, Nutanix Infrastructure, Linux, Windows/Wintel

Security & Operations

Information Security Exposure, Alerting & Thresholds, Incident Analysis, Service Validation, Operational Documentation

Monitoring & Observability

ELK Stack (Elasticsearch, Logstash, Kibana), Zabbix, Metricbeat, Heartbeat, Log Analysis, Kibana Dashboards

Databases

Oracle, MySQL, MSSQL, PostgreSQL

Automation

Python, Shell Scripting, Ansible (Basic)

PROFESSIONAL EXPERIENCE

Cloud Engineer | Airtel Digital (Bharti Airtel) Jul 2025 – Present | Pune, Maharashtra

- Manage end-to-end monitoring and observability for cloud infrastructure using ELK Stack and Zabbix.
- Implement Metricbeat and Heartbeat monitoring for system metrics, uptime, and service availability.
- Create and maintain Kibana dashboards and Logstash pipelines for centralized log ingestion, analysis, and operational visibility.
- Monitor Nutanix infrastructure and API health to support virtualization and cluster stability.
- Perform database monitoring across Oracle, MySQL, MSSQL, and PostgreSQL, including alert configuration and threshold management.
- Create and maintain alert rules, thresholds, and notification workflows to support proactive incident response.
- Support cloud operations across Linux and Windows/Wintel servers through service validation and troubleshooting.
- Use Python and shell scripting to automate monitoring activities and improve operational efficiency.
- Work with customers to gather monitoring requirements and implement customized observability solutions.
- Validate monitoring coverage for servers and services before production deployment.

Cloud Operations & Information Security Intern | Airtel Digital (Bharti Airtel) Jan 2025 – Jul 2025 | Pune, Maharashtra

- Performed monitoring of cloud environments using ELK Stack, including Kibana dashboards and log analysis.
- Observed and analyzed system and application logs to identify anomalies and performance issues.
- Assisted in validating data ingestion from servers into the ELK platform and supported daily monitoring activities.
- Supported senior engineers during incident analysis and production monitoring workflows.
- Gained hands-on exposure to cloud infrastructure operations, information-security practices, log management, and observability.
- Maintained documentation related to monitoring processes and operational procedures.

EDUCATION

Master of Computer Applications (MCA) 2026 – Present | Dr. D. Y. Patil University, Centre of Online Learning, Pune

Bachelor of Engineering – Computer Engineering 2022 – 2025 | AISSMS Institute of Information Technology, Pune | 9.25 CGPA

CERTIFICATIONS & COURSES

- Elasticsearch 8, Kibana, Logstash & Beats – Udemy
- Generative AI and Its Impact to Everyday Business – Airtel
